NATURE

Planting seeds & trees

Whether it's saplings or seeds, we all benefit when we get outside to plant. You'll be getting exercise while creating a healthier environment, helping green the community and or providing food to eat.

Clean air healthy lungs

Trees help clean the air we breath, but they can't do it all. So let's avoid open fires, idling cars or using sprays & gases. This helps cut down on production of greenhouse gases which contribute to pollution in the air.

Keeping it clean

Lets keep garbage, chemicals and waste out of all waters. Protection of all creatures who rely on it is all our responsibility. And remember fresh water is a limited resource we should never waste.

Caring for this habitat

Means ...replanting native trees and plants to support the indigenous animal species food and shelter needs in this area. Avoid polluting the land or the water Support recycling to safely deal with waste.

We'd love for you to become active and help make the world better!

Do you have an eco-friendly product or service you'd like to promote? We'd like to hear from you!
